Aegir Ecology vs Drupal Gardens

- Aegir Project
 - Hostmaster
 - Provision
 - Drush
 - Platforms
 - Upload D6, D7, distro's etc
 - Unix
- Love
- Service Providers
 - Koumbit, Omega8cc
 - PageBuild.net
- Drupal Gardens
 - Drupal 7
- OpenSAAS
 - No Lock-In
 - Export site
 - Upsell to Acquia Hosting
- Proprietary, closed source hosting platform
- Rackspace

Deploying and managing large networks of Drupal sites.

What is Aegir?

The Aegir hosting system allows developers and site administrators to automate many of the common tasks associated with deploying and managing large websites. Aegir makes it easy to install, upgrade, deploy, and backup an entire network of Drupal sites.

Recent support for multi-server site deployment and management allows for migrating sites between servers, including large sites spread across multiple web servers.

Aegir is under active development. You can check out the latest code from Drupal.org's [provision](#) and [hostmaster](#) projects.

Drupal Gardens

Inside Drupal Gardens...

Drupal allows an individual or a community of users to **easily build websites to manage users, site structure and content**. Hundreds of thousands of people are using Drupal to power over 1% of the world's web sites— and now you can too using these features and a little imagination.

The power of Drupal is a click away

With Drupal Gardens, there's nothing to install and no servers to manage. We take care of everything on the backend so you can focus on building great sites.

Choose from several customizable themes

We offer a collection of site templates and themes to help you get started faster. Use our ThemeBuilder to customize an existing theme or design your own from scratch.

Build one site - duplicate to your heart's content

Sometimes, one site is not enough. Drupal Gardens lets you create your own site templates and designs, then clone your templates to roll out new sites in seconds - just add content.

Social publishing, made simple.

 **Simple content editing**
Integrated WYSIWYG editor makes content creation easy,

 **Foolproof media handling**
Upload images quickly to your own Media Library, then reuse

 **Different layouts on every page**
With lots of pre-built page layouts available, you have

Aegir UI - Sites

The screenshot displays the Aegir web interface within a virtual machine. The browser address bar shows `aegir/hosting/sites`. The interface includes a navigation menu with options like 'Content management', 'Site building', and 'Site configuration'. The main content area is titled 'Home' and features a 'Site tasks' section with a 'Verify' dropdown and an 'Add to queue' button. Below this is a table of sites with columns for Site, Profile, Language, Created, and Platform. To the right, there is a 'Queues' section with a table of tasks and their actions, and an 'admin' section with links for account management and site administration.

My new site

INTRODUCTION

Welcome to your new site

Before you get started building your web site there are a few things you need to know.

The most important thing to note is that when you are logged into your Pagebuild site you have a toolbar at the top. The toolbar lets you perform all the different actions required to make a site.

Lets start by giving your web site a better name. Press the "Site Settings" button in the toolbar. This will open a window comprised of a number of sections. The first section is "Site Name" and there is an input field that lets you change the name of your site. Choose a new name and press "Apply". You will see that your site name has changed. The "Site Settings" window contains a number of other site wide operations that you can explore for yourself.

Currently this page is the only page on your web site and it is also the home page. We want to add a new page and make that page the home page. Press the "Add Page" button in the toolbar.

You will be presented with a blank canvas and be ask to give your page a title. Every page must have a title and some content. Choose a title for your new page and then enter some content in the main section. You will notice when you activate the main content area you get a new addition to the toolbar - the editor. The editor lets you perform actions on the content area you are currently working on. If you select some text and then press the "Bold" button you will see that the text is now bold.

You can also use the editor to insert files into your page. If you press the "Images" button you will get another addition to your toolbar that shows you your images. We have given you some example images to use but you can also upload your own by pressing the "Upload" button and browsing to them on your computer (You can upload multiple images at once by holding the control key on your keyboard (Ctrl) whilst selecting them from your computer). For now lets just use one of the example images. Move your mouse over one of them and click and hold. You can then drag this image to the active content area. You can move the image around the content area by doing the same thing.

Once you have released your image you will notice that when you move your mouse over it there is a cog. If you hover over the cog you will be shown the image menu. This menu lets you perform a number of different actions on an image such as giving it a border, caption, margin or making it link to something. Have a play around and see what else you can do.

PageBuild: Appearance

The screenshot displays the PageBuild Appearance interface in a web browser. The browser's address bar shows the URL `permaculture.pagebuild.net`. The interface includes a top navigation bar with buttons for "Add page", "Edit page", "Delete page", "Order pages", "Site settings", and "Appearance". On the right side of this bar, it indicates "14 days left" and features a green "Sign up" button and a "Logout" button. Below the navigation bar, there is a row of five theme thumbnails: "Corporate", "Earth", "Leaf", "Paper", and "Simple". The "Leaf" theme is highlighted with a yellow border and a yellow "Edit" button. A yellow notification banner below the themes states, "You are now using the Leaf theme." Below the banner is a grey bar with the word "INTRODUCTION" in white. The main content area contains a white box with the heading "Welcome to your new site" and several paragraphs of introductory text. The bottom of the image shows a Windows taskbar with various application icons and the system tray.

Aegir + Drupal Agency: Koumbit

The screenshot shows a web browser displaying the Koumbit website. The browser's address bar shows 'www.koumbit.org'. The website has a green header with the Koumbit logo and navigation links: 'À propos de Koumbit', 'Services', 'Portfolio', 'Espace clients', 'Participer', and 'Contact'. There is also an 'ENGLISH' link. Below the header, there are three main service boxes: 'hébergement' (with a castle icon), 'création' (with an ant farm icon), and 'soutien' (with an ant on a leaf icon). A sidebar on the left contains 'Espace Clients' with links to 'Courriel sur le Web', 'Panneau de contrôle AlternC', and 'Wiki'. Below this is a green box with text about Koumbit's mission. At the bottom left, there is a search bar and a 'Recherche' button. The main content area features a 'Nouvelles' section with a headline 'Reprise de la formation Faire son site vitrine avec Drupal' and a 'Portfolio' section with a headline 'Refonte du site principal d'Oxfam-Québec'. The browser's taskbar at the bottom shows various open applications and system icons.

Nouvelles
Reprise de la formation Faire son site vitrine avec Drupal
Chez Koumbit Drupal
Soumis par **sofian** le mar, 19/04/2011 - 13:39
Date et heure:
Lundi, 23 Mai 2011 - 6:00pm
Nous avons suscité tellement d'intérêt pour cette formation que nous la reprenons dans un mois!
Faire son site vitrine avec Drupal
Cette série de quatre cours vous apprendra à créer des contenus Web sur mesure, et profiter des outils puissants de Drupal pour les afficher et les modifier. **Drupal** est un système de gestion de contenu (SGC). Les SGC ou CMS (Content Management System) permettent de générer dynamiquement les pages d'un site web. Le contenu d'une page peut donc varier en fonction du contexte de navigation, de l'utilisateur qui la visite et des permissions qui lui sont attribuées.

Aegir Hosters: Omega8cc

The screenshot shows a web browser window with the URL omega8.cc. The page features a dark blue header with the site name and navigation buttons: About, FAQ, Tweet, Contact, and Buy. The main content area is titled "Aegir Drupal Hosting on Steroids" and includes a paragraph: "Our [Drupal Palettes](#) on [Aegir Hosting System](#) can run even hundreds of times faster than vanilla Drupal hosted elsewhere. Available in multiple US, EU and Asia locations. Free setup. **F-15 performance.**" Below this is an advertisement for "Aegir Mini VPS only \$17/m" featuring a red Mini Cooper and the Apache Solr logo. The ad also states "Beta now available". A sidebar on the right contains a "Drupal Cloud Hosting" menu with links to various services and features.

Drupal Gardens Site Manager

The screenshot displays the Drupal Gardens Site Manager interface. At the top, there's a navigation bar with the logo and user information. The main content area features a 'Site manager' heading and a 'Create a new site' button. Below this is a table listing existing sites. A dropdown menu is open for the 'More' action of the first site, showing options like 'Duplicate Site', 'Export Site', and 'Delete Site'.

Drupal Gardens Theme Builder 1

The screenshot displays the Drupal Gardens Theme Builder interface. At the top, a browser window shows the URL `permaculture.drupalgardens.com/content/industrial-permaculture`. The main preview area shows a website with a green patterned background. A yellow warning box at the top of the preview reads: "A recent update to your site may have accidentally hidden the site name and site slogan." Below this, the text "a new paradigm of democratic, decentralised, open-source, cooperative, organic, peer-production" is visible. The main heading is "Industrial Permaculture", followed by a "View" and "Edit" button. Below the heading, it says "Submitted by permaculturecoop on April 21st, 2010 at 6:13:52 AM". The main text begins with "A new industrial homebrew revolution is fermenting across America: the next generation's design-system synthesis for a democratic industrial ecology. Industrial Permaculture unites ecological & regenerative agriculture, industrial symbiosis, open-source business models, worker and hybrid cooperatives, participatory and peer production, social and commons economics, democratic industry and climate justice. We suggest updates to the permaculture designers manual".

At the bottom of the interface, there is a "Themes" panel with tabs for "Themes", "Brand", "Layout", "Styles", and "Advanced". Under the "Themes" tab, there are several theme thumbnails. The "Kenwood" theme is highlighted with a red border. Other visible themes include "Impact", "Sonoma", "Sparks", and "Bare Bones". The "Kenwood" theme preview shows a similar layout to the main preview but with a different color scheme and content.

Drupal Gardens Theme Builder 2

The screenshot displays the Drupal Gardens Theme Builder interface. At the top, a browser window shows the URL `permaculture.drupalgardens.com/content/industrial-permaculture`. The main preview area shows a website with a dark green background featuring a subtle pattern of white spirals. The website content includes a navigation menu (Dashboard, Content, Structure, Appearance, People, Modules, Configuration, Reports), a home page with a yellow warning message, a paragraph about a new paradigm, a mailing list sign-up form, and a featured article titled "Industrial Permaculture" with a "View" and "Edit" button. Below the preview, a "Themes" panel is open, showing a grid of 20 color palettes with names such as Andover, Canyon, Lilac, Sprout, and others. The interface also includes a top navigation bar with "Help", "My sites", and "permaculturecoop" options, and a bottom toolbar with "Undo", "Redo", "Export", "Save", "Save as", and "Publish" buttons.

Drupal Gardens Theme Builder 3

The screenshot displays the Drupal Gardens Theme Builder interface. At the top, a browser window shows the URL `permaculture.drupalgardens.com/content/industrial-permaculture`. The main preview area shows a website with a dark green background and a white content area. The content includes a navigation menu, a home page with a warning message, a paragraph about a new paradigm, a heading for "Industrial Permaculture", a "Join our mailing list" form, and a text block. Below the preview is a layout editor with a toolbar containing "Themes", "Brand", "Layout", "Styles", and "Advanced". The layout editor shows a grid of blocks labeled A, B, and C, with a "Save" button and a "Publish" button. A "Save as" button is also visible. A "Applied to all pages" label is present in the bottom right of the layout editor.

Aegir Ecology vs Drupal Gardens

- Aegir Project is fair trade, organic, shade grown, biodynamic, no animal testing
- Aegir can be homebrew (self-hosted)
- Aegir Project is community
- Aegir creates your own Drupal Ecology i.e. PageBuild.net
- Drupal Gardens is Rackspace + Acquia Team
- Drupal Gardens is always there
- Drupal Gardens is keystone
